RE: Environmental & Green Job Policy

Dear First Dog,

Rumor has it you do like dog bones.

Wonder if you would be interested in working a deal?

We are looking for someone who might care if Smog Check failed car fault gets fixed.

Can you consider working a deal for your favorite supply of dog bones?

Improved Air and business from preventing car pollution might put the Governor at par with my Hero Senator Boatwright.

Our proposal:

44036 (b) To achieve the goal of consumer protection and quality assurance the department (DCA-BAR) is directed to adopt in-field audits using known vehicle defects. The in-field audits will be used to determine if a technician does actually detect, diagnose and repair the designated audit vehicle defect.

(c) As there is no clear standards to see that the emissions defects are being corrected, these audits are to be conducted without notification being provided to insure accurate assessment. The improved methods generated by the audits will provide continuous improvements in the quality of vehicle repairs actually occurring.

Senator Boatwright was my hero, the Senator stopped the privatization of Smog Check three times.

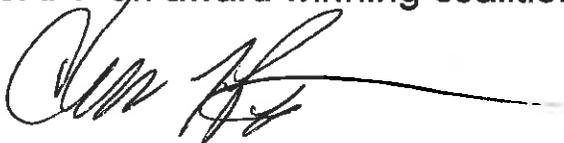

UTC-ESP-Envirotest, a major lobby group was stopped by Dan at least three times.

Big lobby vs. Dan was a one sided unfair contest with Dan the winner.

My secret unpublished private phone number is (510) 537-1796

Let's make a deal.

CAPP an award winning coalition of motorists.
