

Attention Employers!

Alameda County now has funding for a limited number of subsidized employment positions.

How your business can benefit if you hire a qualified job seeker from our CalWORKs program:

Your company can receive reimbursement for 50% of the employee's wages for the first 6 months of employment.

How it works:

You provide us with a job order that includes the qualifications for the position. Our job developers will screen applicants and connect you with job seekers. You then interview the job seeker. If you choose to hire the person our job developer will assist you with the simple paperwork that is required prior to the employee's start date and explain the easy monthly wage reimbursement process.

*Maximum wage at 50% subsidy is \$20 per hour. Wages exceeding \$20 per hour will be reimbursed \$10 per hour.

If you have a job opening please contact our Alameda County Job Developer for more information.
